

Heidenhain compatible styli

Improve your machine tool
performance with durable styli

Precision styli for Heidenhain measuring systems

Heidenhain compatible styli are designed for use in CNC machine tools, offering features that support operations with optimal performance. These styli have high-quality ruby balls and come in various geometries with M3 threads, providing versatility and flexibility of use.

From a ball diameter of 4mm, the styli include a predetermined breaking point to prevent damage to the measurement system under excessive load or force.

Designed for harsh environments, this range of styli is robust and reliable, ensuring optimal performance even in the toughest conditions.
