

Styli compatible with your CMM

High-quality styli solutions for all common measuring systems and measuring machines

Precision begins at the probing point

Compatible stylus solutions for your CMM – high-quality, reliable, and designed to meet your measuring requirements

When every measurement result matters, nothing should be left to chance when it comes to the stylus. With itp, you receive high-quality styli and accessory solutions that are precisely suited to your measuring system, your application, and your quality requirements – delivering reliable measurement results you can trust.

We offer a wide selection of compatible styli and accessories for coordinate measuring machines and gear measuring systems. These are suitable for measuring systems from various manufacturers, including Hexagon, Keyence, Leitz, Mitutoyo, Renishaw, TESA, Wenzel, ZEISS, and many more.

Our experienced team provides support to help you quickly find the right solution for your measuring task.

Your benefits at a glance:

- Compatible styli for all common measuring systems
- High-quality materials for precise and reliable measurement results
- Technical support from experienced itp experts
- Large standard range for many applications
- Custom styli can be easily configured online
- Premium quality at competitive prices

Find the stylus that truly fits your measuring task – with itp as your strong partner for precision, compatibility, and service.

ZEISS

ZEISS-compatible styli and accessories from itp

High-quality, fully compatible solutions that support precise measurement, streamline processes, and help keep your measuring room running.

More performance for your budget

We offer high-quality M3 and M5 styli, adapter plates, and accessories for ZEISS measuring systems—precise, reliable, and stocked for quick delivery. An economical solution that perfectly combines quality and cost efficiency. With our attractively priced adapter plates for ZEISS VAST, VAST gold, and XXT probe heads, stylus configurations can be changed automatically. This speeds up measuring processes, shortens cycle times, and reduces calibration effort.

Why customers choose itp:

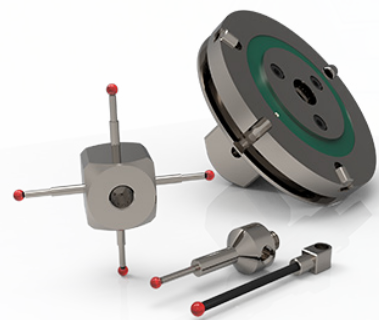

- Seamless compatibility with selected ZEISS systems
- Maximum precision for reliable measurement results
- Cost-effective alternative with convincing quality
- Short delivery times supported by strong stock levels
- Standard products and customised solutions from a single source
- Personal support from experienced metrology experts

Highlight: Easy adapter plate for ZEISS VAST

With an active ID chip and innovative clamping function, the Easy adapter plate enables fast and convenient adjustment of the cube mount—without complete disassembly.

Custom application solutions designed to meet your specific requirements:

Designed for real-world applications, flexibly implemented, and often available within just a few days, depending on complexity.

Renishaw

Optimised for your CMM – itp styli compatible with Renishaw

itp styli are optimised for use in coordinate measuring machines (CMMs) and integrate seamlessly into Renishaw measuring systems.

We offer a comprehensive product range:

- Straight styli for standard applications
- Star styli for complex geometries
- Disc and cylinder styli
- Threadless systems for quick adjustment
- Micro styli for precise measurement of the smallest features
- Extensions, joints and holders
- Custom solutions for unique applications

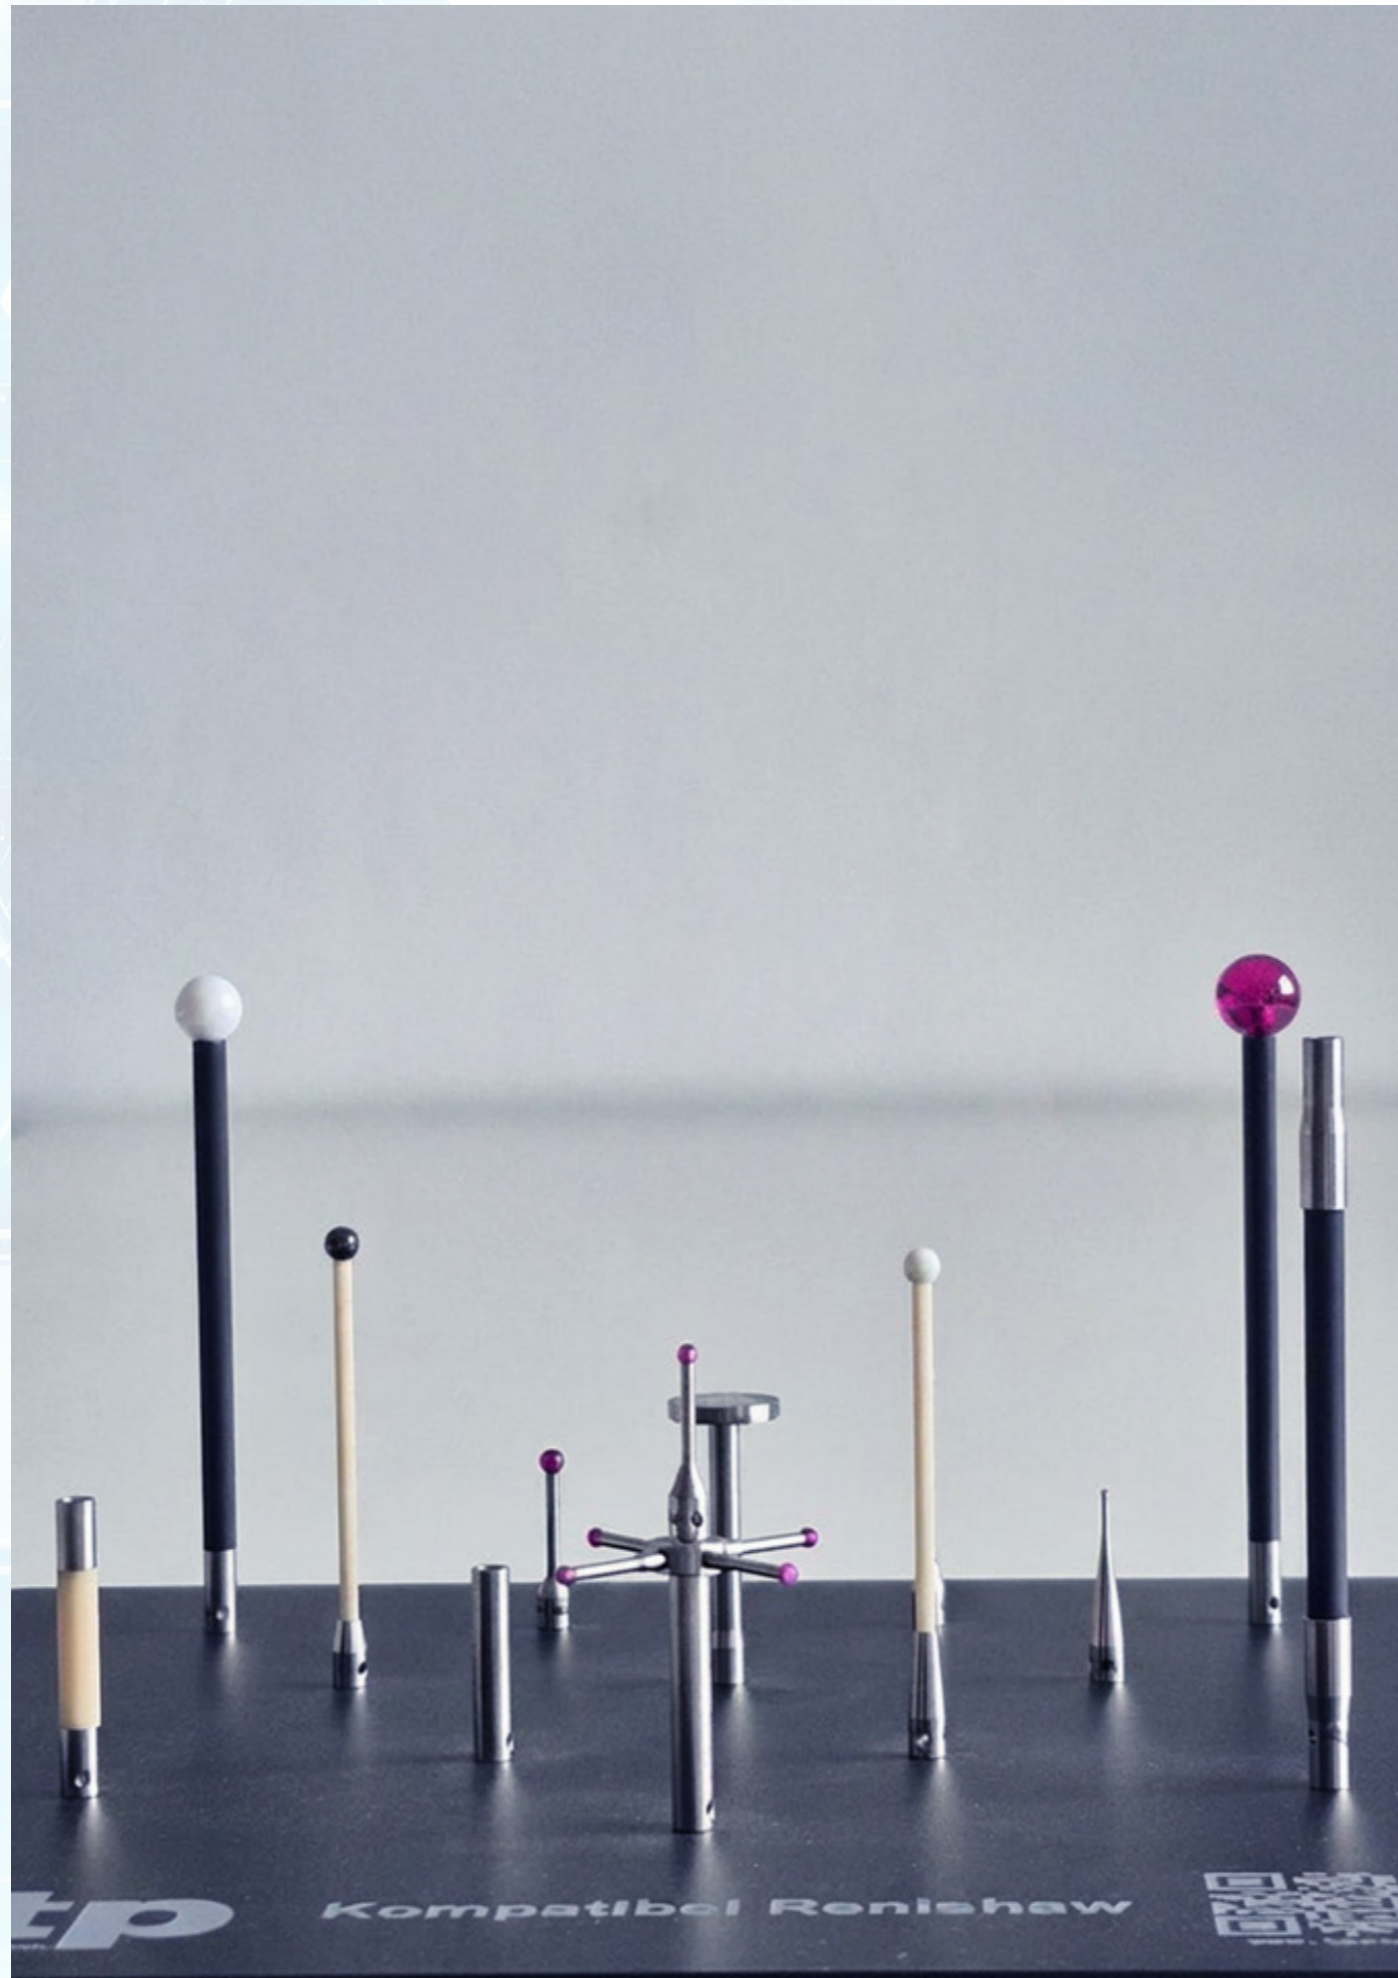

The right stylus configuration for every measurement task

Your benefits

- 100% compatible with Renishaw
- Ready to use straight away – no adjustments required
- High repeatability
- Flexible stylus configurations
- Short lead times and personal support

Mitutoyo

Styli made by itp: Precision for every Mitutoyo coordinate measuring machine

Full compatibility with Mitutoyo CMMs, all common standard threads, and precise measuring results: the itp product range offers reliable solutions for everyday measuring applications. High-quality workmanship, precision manufacturing, and a wide selection of styli and accessory components enable flexible adaptation to every CMM application.

A product range tailored to your measuring task

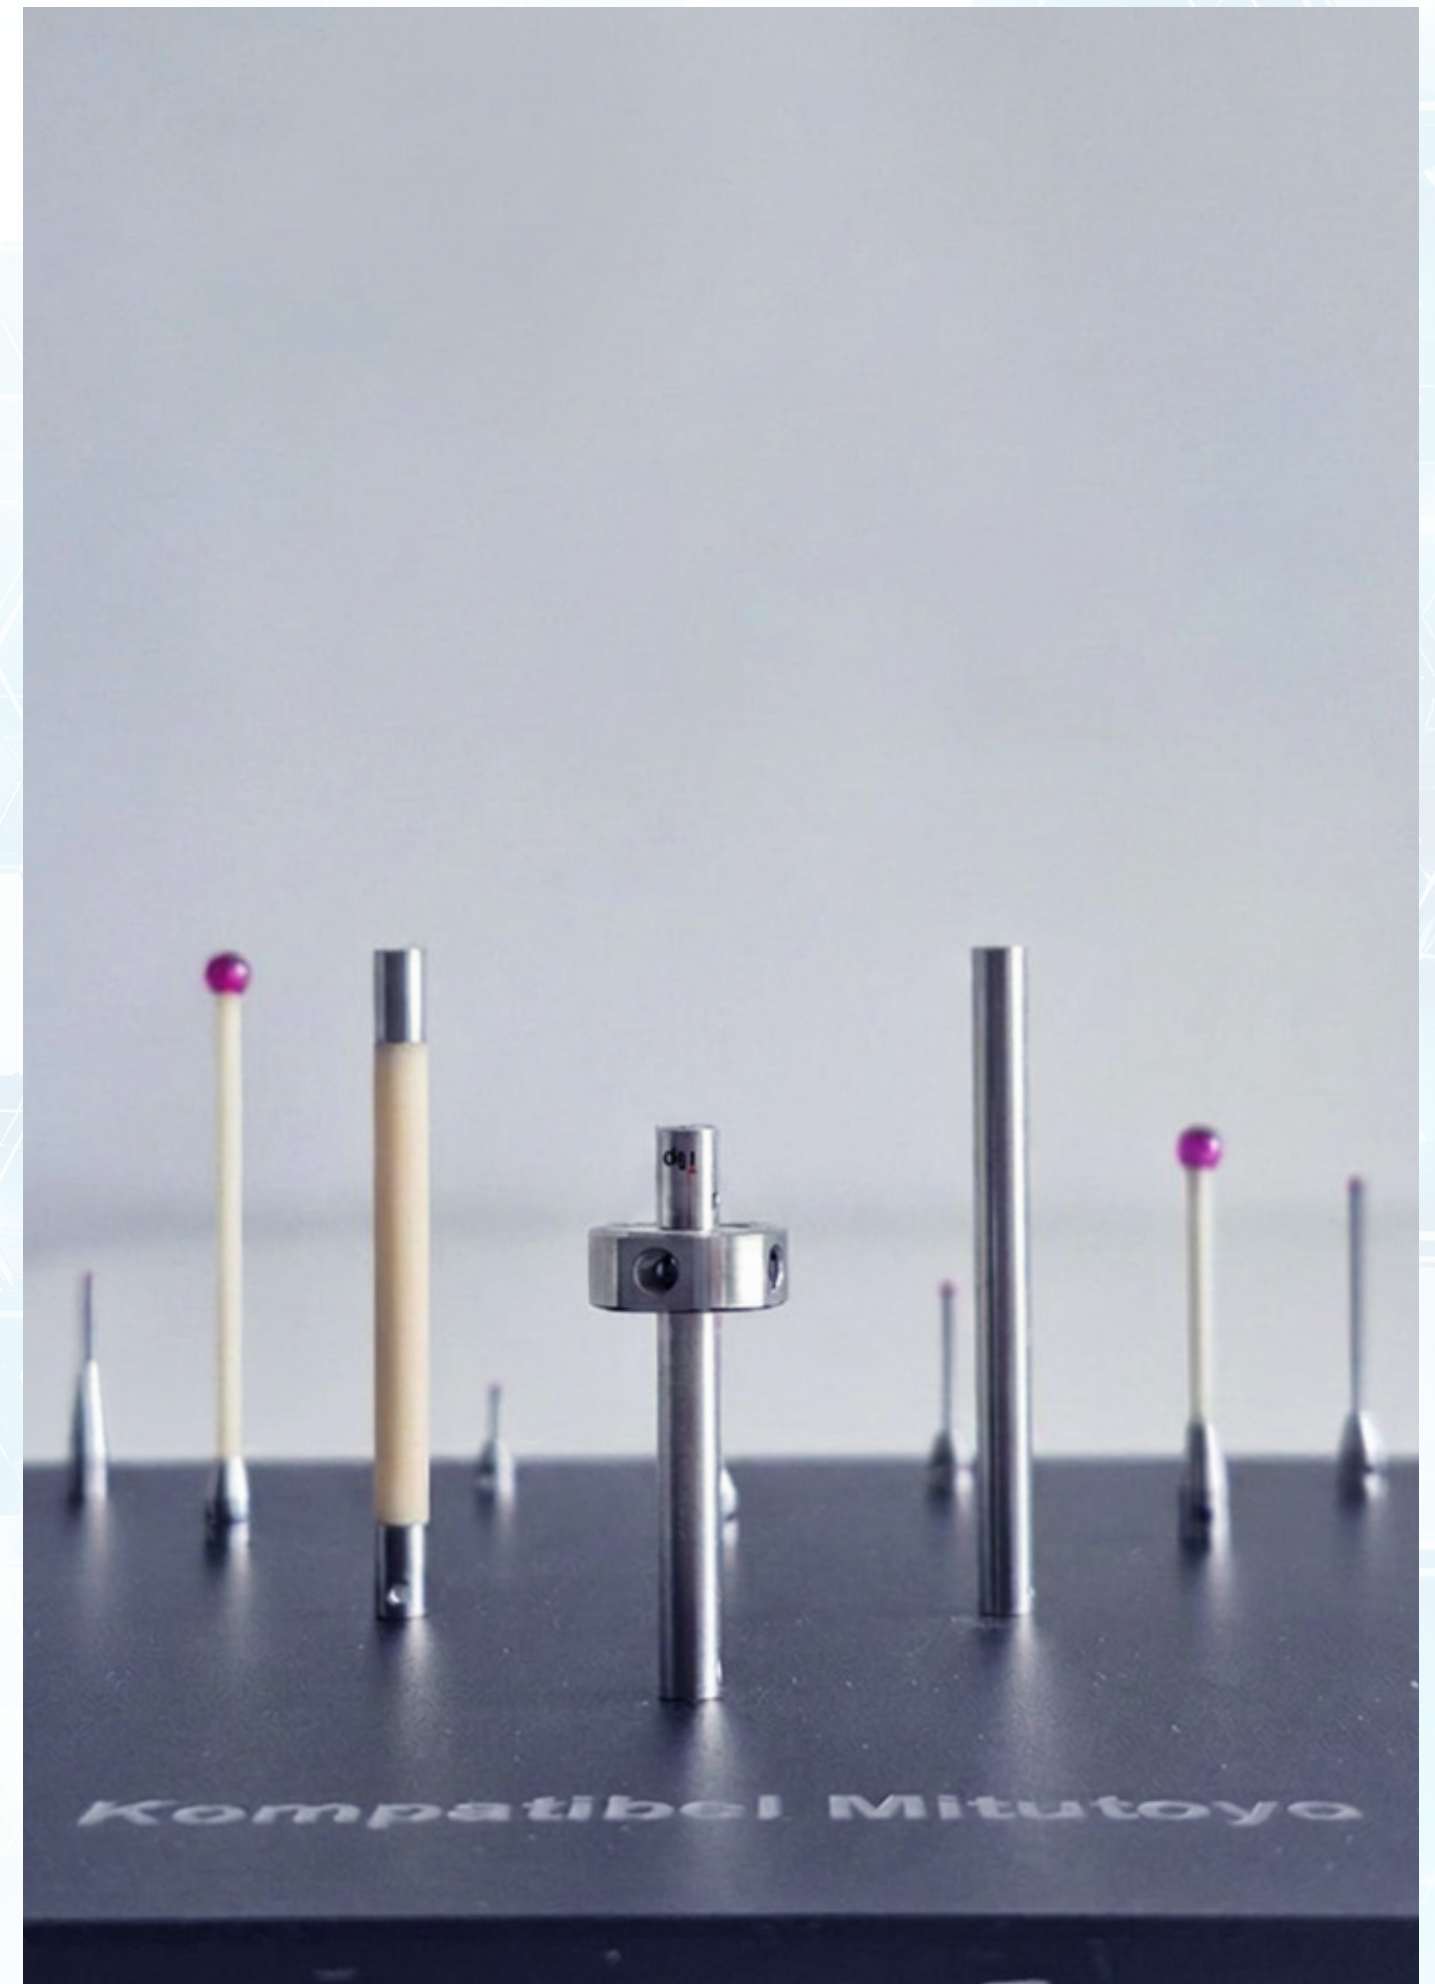

Different ball diameters, stem lengths, material combinations, and thread sizes allow optimal alignment with the workpiece, measuring strategy, and inspection requirements.

Your benefits with itp

- Full compatibility with Mitutoyo coordinate measuring machines
- High-quality styli and accessory components for precise measuring results
- Wide selection of materials, ball diameters, shaft lengths, and thread sizes
- Short delivery times and fast availability
- Custom styli produced by itp according to individual measuring requirement

Hexagon

itp Styli for Hexagon Measuring Systems

Precision you can rely on.

Measure with confidence. Work efficiently. Achieve results you can trust.

itp offers high-quality, fully compatible precision styli and accessories for Hexagon CMM measuring systems. Whether for series inspection, initial sample inspection or the measurement of complex component geometries, our products stand for outstanding quality, reliability and process stability in daily use. With a wide selection of styli, extensions and accessories, you can find the right solution for almost any measuring task – from standard applications to customer-specific designs.

Your benefits at a glance

- Fully compatible with Hexagon measuring systems
- Maximum process reliability in the measuring room
- Wide range of styli and accessories
- High-quality materials such as ruby, ceramic, carbide, titanium and carbon fiber
- Precise and repeatable measuring results
- Robust design for everyday use
- Attractive price-performance ratio
- Fast availability and customer-specific solutions

More confidence for every measuring task

With itp, you choose precision styli that optimally complement your Hexagon CMM applications. Thanks to outstanding manufacturing quality, tight tolerances and durable materials, our products support stable measuring processes, reduce measurement uncertainty and deliver reliable results – day after day.

itp – The cost-effective and reliable choice for your Hexagon metrology.

Klingelnberg

itp styli for Klingelnberg precision measuring centres

itp offers high-quality styli for Klingelnberg precision measuring centres. Our solutions support reliable measurement results, high repeatability and flexible applications in gear and precision measurement technology.

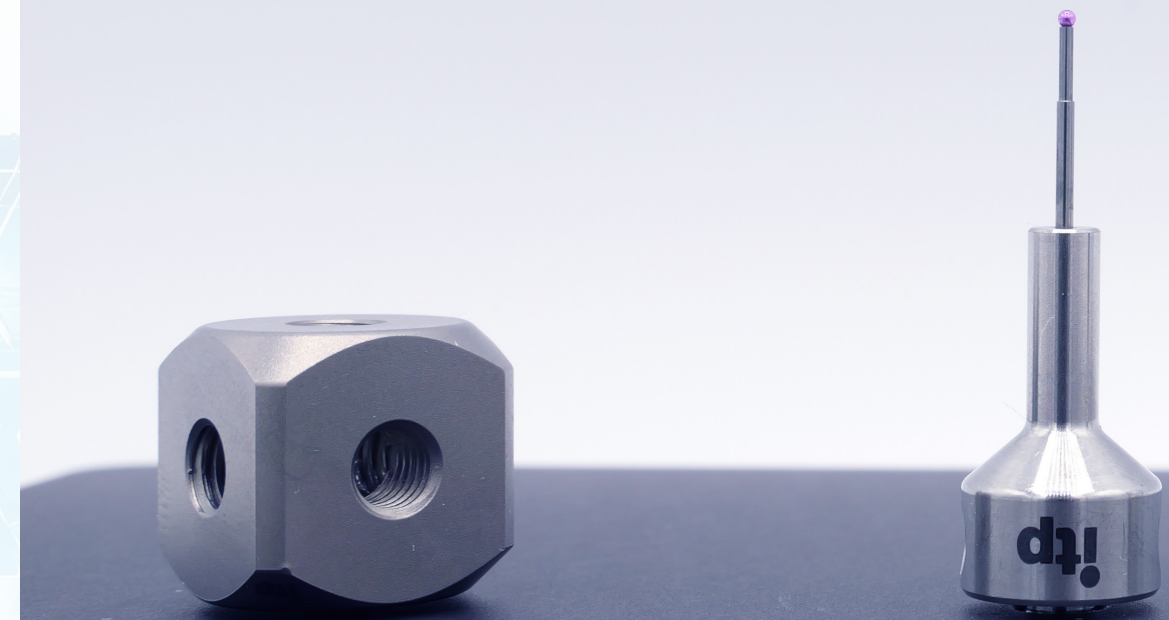

From standard straight styli, extensions and cubes to fully customised solutions, our range is designed to help you achieve reliable, accurate measurements across a wide variety of applications and component geometries.

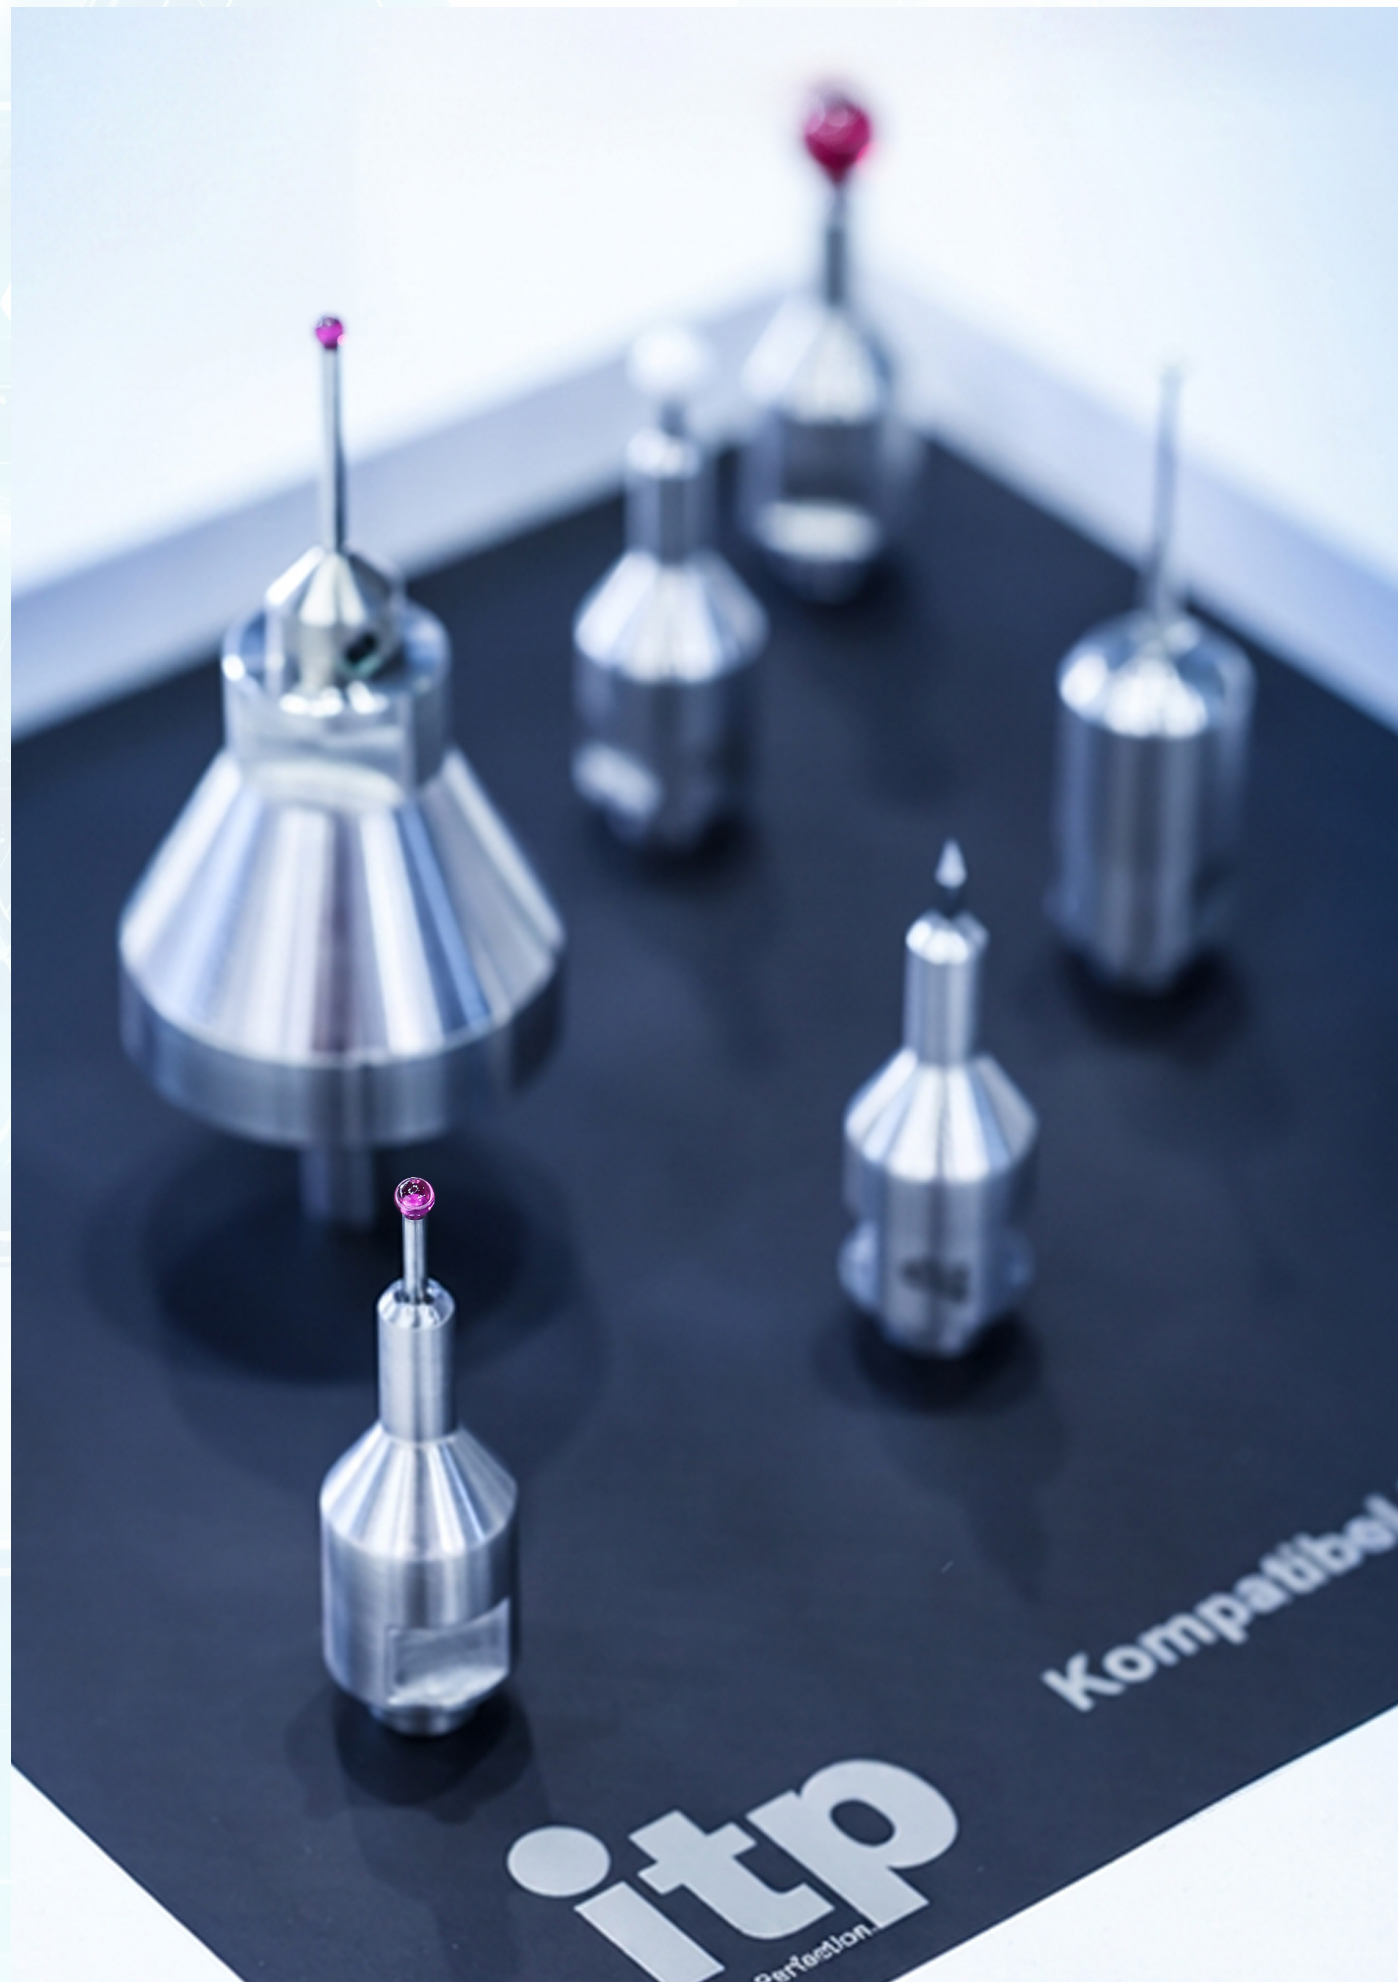

Your benefits

- Plug and play – seamless integration with Klingelnberg precision measuring centres
- Wide selection of styli, accessories and customised solutions
- High quality for precise and repeatable measurement results
- Fast availability and personal technical support

FARO

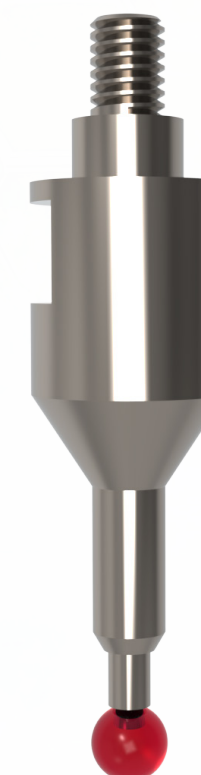

itp styli for FARO Measuring Arms

Precise. Robust. Seamless Integration

itp offers high-quality styli and accessories for FARO measuring arms – developed for reliable and reproducible measurement results in daily use. Thanks to full system compatibility, our styli can be seamlessly integrated into existing FARO applications, enabling precise and efficient measurement directly on the workpiece.

Your benefits with itp

- **100% compatible** with FARO measuring arms
- **Maximum precision & repeatability** for reliable measurement results
- **Robust design** for daily use in quality assurance
- **Seamless integration** – ready for immediate use without any adjustment effort
